

Subject: New Gate at the gun club

Body: We have a new security gate at the club. Here are the procedures and rules for using the gate.

Current Swipe Badges and Key Fobs:

Your current Swipe Badge and Key Fob will open the gate to enter the grounds. If they don't work, please contact the membership chairman at membership@wallumlake.com to learn why your card/fob isn't working. Everyone that has access to the main building swiper will have access to the gate.

Tailgating:

Tailgating is not allowed because the system is designed to allow one vehicle at a time to pass through the entrance or exit gates. Anyone who tries to tailgate and causes damage to the gate will be responsible for the damage.

Public Events:

During public events, including but not limited to trap, skeet, outdoor range matches and walls events, the gates will be in the upright position. During those times, any member or non-member can pass through the gates.

Committee members that have public events, contact Scott Martin at, scott.martin1@cox.net for instructions on opening the gate.

Guest:

During public events, the gates will be raised and guests can go through the gates. If the gates are down, meaning no public event is on the schedule, guests will need to go through the gates with a member and the guest's car must stay in the upper parking lot in front of the gate (the clubhouse parking lot). If the gates are closed after the event and a guest car is still on the grounds behind the gate, it will open and let them out when they pull up to the exit gate.

Entrance:

The entrance is to the right of the island as you approach the island. A lift gate that has red lights on it blocks the entrance. Pull up to the lift gate and align with the 12" swipe pad coming off a gooseneck on the island and use your swipe badge or key fob to lift the gate. You should be able to get your vehicle within 12" of the swipe pad and the light should go green. (You might hear a beep.) At this point the gate will go up. When the gate is fully raised, its lights will turn green and you can drive

through. After you pass the island, the gate will come down and wait for the next member to swipe in. Do not try to drive through the entrance until the lift gate is fully up and green.

Exit:

Exit to the right of the island as you approach the island. Across the exit is a lift gate that has red lights on it. Pull up to the lift gate and the gate should lift—you can exit when the lift gate turns green. After you pass the island, the gate will come down and wait for the next car to pull up and exit. Do not try to exit until the lift gate is fully up and green.

Persons who damage the gate due to negligence or not following these instructions will pay for the damage.

Please do not try to drive around the gate under any circumstances. If you do, the club will take disciplinary action.

Thanks,

BOD
